ABSTRACT

This document is one of three in the "Skills for Life: Library Information Literacy" series designed to cover the entire kindergarten through 12 curriculum. The looseleaf notebook format allows the user to add information and pages and personalize the materials. This volume is devoted to high school grades 9 through 12. The 59 lesson plans for teaching information and library skills to high school students are grouped into the following sections: (1) "Basic Library Foundations" such as designing library lesson plans and bibliographic instruction; (2) "Connecting with the Curriculum" and researching with nonprint materials; (3) "Putting Research Strategies to Work" including using primary and secondary materials; (4) "Connecting with Technology" and teaching boolean search skills; and (5) "The Future" in terms of the librarian's role and instructional tools. A list of 62 professional resources is included. (SLD)
